## DETAILED ACTION

This is a response to the amendment filed 8/22/2005. Claims 1-22 are pending and are under examination.

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the recitation of “the current selector circuit” in line 2 lacks proper antecedent basis.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichimaru (USP 5,661,426).

Figure 1 of Ichimaru shows a current selective D flip flop circuit capable of performing biasing current selection, the current selective D flip flop circuit comprising a D flip flop (11-18), a current multiplier (19, 20, 22-24) coupled to the D flip flop, and biasing current selector

(25, 26, 27, 28, 45, 46) provides at least two input terminals for receiving at least two biasing currents (I1, I2) for selecting one of the at least two biasing current for biasing the D flip flop (when transistor 27 is off, I1 is selected to coupled to the current multiplier 4, when the transistor 27 is on, the difference/sum of I1 and I2 is coupled to the current multiplier 4) as called for in claim 21.

Regarding claim 22, the current multiplier 4 comprises a current mirror source (19, 23, 20; 24) coupled to the current selector circuit, a multiple output current mirror being to the current mirror source and the D flip flop.

***Allowable Subject Matter***

3. Claims 1 and 3-20 are presently allowed.
4. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2816

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
